Microsoft is certainly not harming the consumer. I am a consumer and I love their products and the decent prices.

Many of these states and companies which are suing Microsoft are not doing it to benefit the consumers, but to get as much as they can. I attended a Jesuit University, Gonzaga U in Spokane. I find the people intent on getting money from Microsoft are just out to get their hands on some dough. Surely the justice department has more important things to concern itself with. Please, let's move on.
